CASE STUDY:

**POPPY LANE
BESPOKE
LANDSCAPING
PROJECT**

PROJECT OVERVIEW.

Soft landscaping in an exclusive development of high end residential properties within a village location.

OUR SCOPE.

This development of **bespoke** residential homes within the village of Soulbury required expert planting across an extensive area.

The **planting scheme** was designed to include native and **specimen shrubs** alongside **aquatic plants** and **grasses** surrounding an attenuation pond.

Outside of the residential development, we formed **grazing pasture** to blend the new landscape into the existing farmland.

THE OUTCOME.

Liaising with the developer to ensure our works didn't obstruct other trades working on site, we delivered the planting scheme on time and budget, with minimal plant losses.
